

Job Profile

Position Title: Application Architect/Senior Developer

Department: eBusiness

Position Summary

C2 is seeking an Application Architect/Senior Developer to lead the design, architecture and development of large-scale application development projects. The successful candidate will oversee technical teams, present and defend architecture and technical choices to internal audiences and clients and facilitate working sessions with cross-functional teams to bridge the business/technology gap. Five to seven years of experience with ASP.NET (C#) development, with a strong background in web-based development, object-oriented concepts, relational database design and SQL Server development is required.

Responsibilities

- Lead the design, architecture and development of large-scale custom application development projects
- Present and defend architecture and technical choices to internal audiences and clients
- Interact with internal technical, business and management staff, as well as clients
- Oversee technical team, design and the development process
- Ensure all communication needs are identified in communication plan and addressed
- Drive technical standards
- Mentor developers and serve as an evangelist to the technical team
- Participate in the pre-sales and solution development phases of the business development lifecycle
- Facilitate working sessions with cross-functional teams and bridge the business/technology gap
- Keep current with technology trends and developments in the industry

Knowledge, Skills & Certifications

- Five to seven years of demonstrated experience with ASP.NET (C#) development, with a strong background in web-based development, object-oriented concepts, relational database design and SQL Server development
- Strong, demonstrated hands-on application architecture and design skills
- Demonstrated experience facilitating sessions with a cross functional audience
- Experience with enterprise integration
- Bachelor's degree in a related field (computer science, MIS, electrical engineering)
- Professional services experience is desirable

Additional Requirements for all C2 Employees

- Strong communication skills and ability to present to small/medium groups
- Excellent customer relationship skills
- Ability to work in a fast-paced team environment
- Demonstrated ability to successfully multi-task
- Proficient in Microsoft Office applications
