

**Position Title: Software Quality Assurance Specialist**

**Department: eBusiness**

## Position Summary

C2 is seeking a Software Quality Assurance (QA) Specialist to plan, design and execute the testing of eCommerce web-based applications. The successful candidate will review requirements and functional documents, create test plans and scripts, execute test cases, manage issues and results and guide our customers through the UAT testing process. Two+ years' experience working with test strategies and plans, as well as writing test cases and conducting hands-on testing is required. Experience with SDLC and QA process/test methodologies and experience creating/executing Visual Studio (or similar) test tools is also required. Knowledge of software build and release management processes and B2C eCommerce experience is desirable.

## Responsibilities

- Review requirements and functional documents
- Create test plans that incorporate functional testing, supported browser testing, integration and regression testing
- Create, maintain and execute test scripts, including manual test cases
- Manage issues and results reporting
- Work with Project Leaders and Application Engineers to resolve anomalies
- Guide customers through the UAT testing process

## Knowledge, Skills & Certifications

- 2+ years' experience defining test strategies and plans
- Solid understanding of SDLC and QA process and test methodologies
- Experience creating and executing Visual Studio test tools for functional and performance testing
- Competency in the principles and practices of quality control as it relates to software testing
- Bachelor's Degree in related field

## Additional Requirements for all C2 Employees

- Strong communication skills and ability to present to small/medium groups
- Excellent customer relationship skills
- Ability to work in a fast-paced team environment
- Demonstrated ability to successfully multi-task
- Proficient in Microsoft Office applications
